gan bro Tar	mmy, Becca, and Sydney are in the mes, they went to a party at Greg's ther. Greg's parents bought beer mmy drank one beer and Becca tradid not try marijuana. The police	s house. Greg is i and stated that the ied some marijuar	n the 10 th grade and is the kids could drink as long a that her brother gave he	best friend of Becca's as no one drove home. r. Sydney did not drink				
1.	Should all of the girls receive the	ne same punishmen	nt? Why or why not?					
2.	Before joining the basketball teathat students can be terminated. What should happen to each of	from the team if th						
3.	What, if anything, should happe	en to Greg's paren	s?					

What punishment, if any, should the girls receive from the community?

EFFECTS OF OTHER DRUGS

Read the following case studies. Write the response that you would have if you were the judge in these cases. Case Two Billy and David are best friends in 7th grade. They both have difficulty concentrating on their school work, and David stakes a medication called Ritalin to help him with attention deficit disorder. The medicine appears to work, and David's grades have improved since he began taking the medicine. Billy continues to have problems with schoolwork, and David offered to let him try the Ritalin for a couple of days to see if it would work. David brought some of the medicine to school. On the first day, Billy took the medicine and stated that it did help. The second day, David was caught giving Billy the medicine. 1. Should both boys be punished? Should they receive the same punishment? Why or why not? 2. The school has strict policies related to drug use. Should this incident fall under the same policies as with other drugs such as alcohol and marijuana?	960 St. 40. 10	EC10 01 0111	HILEGO OF CHIEF SILVES
