

EFFECTS OF OTHER DRUGS

Objectives

1. Students will recognize that all chemicals introduced into the body can cause changes in the body.
2. Students will understand that even small amounts of illegal or misused drugs can have negative impacts on the brains of children.
3. Students will be able to describe how perception can be changed by drugs.
4. Students will understand their school policies and consequences related to the possession and use of drugs.
5. Students will acknowledge that most youth **do not** use alcohol, tobacco, or illicit drugs.
6. Students will commit to being drug free from illegal drugs and to use prescribed and over the counter medicines as directed and under the guidance of a responsible adult.
